| 10. <input type="checkbox"/> Natural Numbers $\mathbb{N}$                 | <input checked="" type="checkbox"/> J. The set of all elements that are in either <u>A</u> or <u>B</u> |
| 11. <input type="checkbox"/> Additive inverse of a number $a$             | <input checked="" type="checkbox"/> K. The set of all elements that are in both <u>A</u> and <u>B</u>  |
| 12. <input type="checkbox"/> Motion formula                               | <input checked="" type="checkbox"/> L. The set of all elements that are in A but not in B              |
| 13. <input type="checkbox"/> Commutative Property                         | <input checked="" type="checkbox"/> M. True for only some instances of the variable                    |
| 14. <input type="checkbox"/> Multiplicative inverse of a number $a$       | <input checked="" type="checkbox"/> N. Always true for all instances of the variable                   |
| 15. <input type="checkbox"/> Identity equation                            | <input checked="" type="checkbox"/> O. Never true for any instance of the variable                     |
| 16. <input type="checkbox"/> Intersection of sets $A \cap B$              | <input checked="" type="checkbox"/> P. The set of counting numbers                                     |
| 17. <input type="checkbox"/> Relative complement of sets $A/B$ or $A - B$ | <input checked="" type="checkbox"/> Q. The set of all numbers that can be written as a decimal         |
| 18. <input type="checkbox"/> Contradiction equation                       | <input checked="" type="checkbox"/> R. The set of all numbers that can be written as fractions         |
| 19. <input type="checkbox"/> Associative Property                         | <input checked="" type="checkbox"/> S. The set of all non-terminating, non-repeating decimals          |
| 20. <input type="checkbox"/> Distributive Property                        | <input checked="" type="checkbox"/> T. The set of all positive, zero, and negative whole numbers       |

II. Translate the verbal expression into a variable expression in terms of a single variable. Do not simplify.

21. The total of twelve times a number and three less than the number.

$$+ (12 \cdot n) + (n - 3)$$

$$12n + n - 3$$

22. Twice the difference between four more than twice a number and one more than the number.

$$2 \cdot [4 + 2n - (n + 1)]$$

III. Write a linear (single variable) equation to describe the word problem. Do not solve.

23. Find three consecutive odd integers such that twice the difference between the first and third is 19 less than the second.  $x, x+2, x+4$

$$2[x - (x + 4)] = x + 2 - 19$$

24. 50 pounds of delicious Jamaican Blue Mountain coffee that costs \$28 per pound are mixed with Fakin' Blue Discount Coffee that costs \$4 per pound. How much Fakin' Blue is needed to make a coffee blend that costs \$15 per pound?

|       |        |      |            |
|-------|--------|------|------------|
| JBM   | 50     | \$28 | $50(28)$   |
| FB    | $x$    | \$4  | $4x$       |
| blend | $50+x$ | \$15 | $15(50+x)$ |

$$50(28) + 4x = 15(50 + x)$$

IV. Simplify the expression.

25.  $5 - [2n - 2(3n + 1)]$

$$5 - [2n - 6n - 2] = 5 - [-4n - 2]$$

$$= 5 + 4n + 2 = \boxed{4n + 7}$$

26.  $| -5 + 3 | - | -1 | + (-4)(5)$

$$= | -2 | - | -1 | + (-20)$$

$$= 2 - 1 - 20 = \boxed{-19}$$

V. Solve the linear equation.

27.  $5(2 - x) = 1 - 2[x - 3(x + 2)]$

$$10 - 5x = 1 - 2[x - 3x - 6]$$

$$10 - 5x = 1 - 2[-2x - 6]$$

$$10 - 5x = 1 + 4x + 12$$

$$10 - 5x = 4x + 13$$

$$\frac{-3}{9} = \frac{9x}{9}$$

$$\boxed{-\frac{1}{3} = x}$$

28.  $-(-8r + 1) = -(-3 - 5r) - 6r$

$$8r - 1 = 3 + 5r - 6r$$

$$8r - 1 = 3 - r$$

$$\frac{9r}{9} = \frac{4}{9}$$

$$\boxed{r = \frac{4}{9}}$$

$$\begin{matrix} 5 - x \\ = 5 + (-x) \end{matrix}$$

VI. Given the sets A, B, and C (and all the usual sets listed on the first page), determine the following unions, intersections, and relative complements. Give the answer in the simplest form possible.

$$A = \{1, 2, 3, 4, 5\}, B = \{-2, -1, \frac{1}{2}, \frac{5}{6}, 3, 5, 6\}, C = \{-\sqrt{5}, \pi\}$$

29.  $A \cup N = \mathbb{N}$

31.  $A - B = \{1, 2, 4\}$

30.  $C \cap Q = \emptyset$

32.  $B \cup \mathbb{R} = \mathbb{R}$

VII. Solve the linear inequality. Give the solution in your choice of interval or set-builder notation.

33.  $3x + 5 > 5x + 9$

$$3x - 5x > 9 - 5$$

$$-2x > 4$$

$$x < -2$$

$$\{x \mid x < -2\}$$

$$(-\infty, -2)$$

34.  $10x - 10 \leq 7x + 5$

$$3x \leq 15$$

$$x \leq 5$$

$$\{x \mid x \leq 5\}$$

$$(-\infty, 5]$$

VIII. Graph the compound inequality on the number line, and give the solution in your choice of notation.

35.  $x < 3$  and  $x \geq -5$

$$\boxed{[-5, 3)} \quad \{x \mid -5 \leq x < 3\}$$

37.  $x < 2$  or  $x \geq -3$

$$\mathbb{R} = \boxed{(-\infty, \infty)}$$

36.  $x > 4$  and  $x \leq -2$

$$\boxed{\emptyset}$$

38.  $x > 1$  or  $x \leq -4$

$$\boxed{(-\infty, -4] \cup (1, \infty)}$$

$$\{x \mid x \leq -4 \text{ or } x > 1\}$$
