Recommended textbook problems from Ch 5 assigned since Sept 18:
5.1 #63--85 odd
5.2 #3-7odd, 15--25odd, 35--49odd
5.3 #25--29odd, 43--51odd, 61--67odd, 89-97odd, 109--117odd
5.4 #19--25 odd; 27--43 odd; 55--61 odd
5.5 #21--47 odd; 79--137odd
5.6 #3-131odd
(obviously sections 5.5 & 5.6 on factoring have a lot of problems, but you don't have to do them all unless you need to; work the simple ones until you get the hang of it, then work the more challenging ones until you're getting them all correct)
5.7 #35-49odd; 51-57odd;61-75odd

Recommended for Test Preparation:
Old Test #3 on web site: http://www.asms.net/brewer/algebra/2010fall-intermediatealgebra-test3.pdf
Ch 5 Review/Test/Cumulative Review in textbook pp. 320-324
*The answers to all of these problems, even AND odd, are in the back of the book. If you can do all of these problems correctly, you are well-prepared for the test on Tuesday.

Khan Academy Ch 5 stuff is all listed on the digital syllabus: http://www.asms.net/brewer/intermediatealgebrasyllabus.html

You can also still bring up your homework grades on Ch 1-4 work if you practice those and work toward mastery.
