

Review:

A reference angle for an angle whose initial side is on the positive x-axis and terminal side may lie in any of the four quadrants is the positive acute angle between the terminal side of the angle and the x-axis.

Evaluate the following trigonometric expressions. Give exact answers. You do not have to rationalize. Draw a picture if this helps you.

$$\sin 45^\circ$$

$$\boxed{\frac{1}{\sqrt{2}}}$$

$$\tan 60^\circ$$

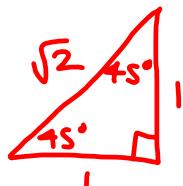

$$\boxed{\sqrt{3}}$$

$$\sec 45^\circ$$

$$\boxed{\sqrt{2}}$$

$$\csc 30^\circ$$

$$\boxed{2}$$

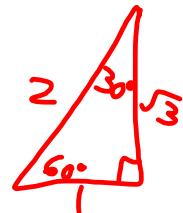

$$\sec(-270^\circ)$$

$$\frac{1}{0} \boxed{\text{undefined}}$$

$$\cot(120^\circ)$$

$$\boxed{-\frac{1}{\sqrt{3}}}$$

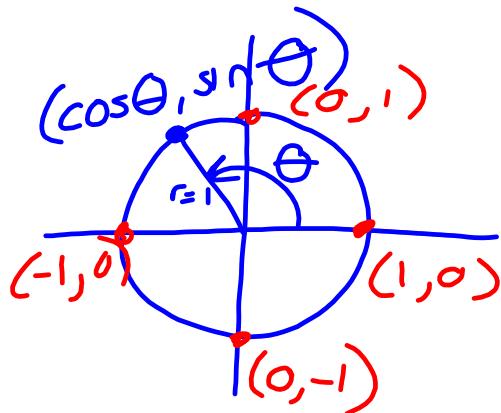

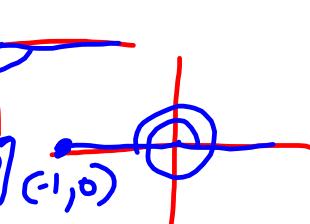

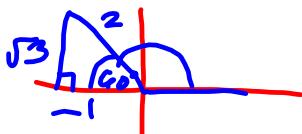

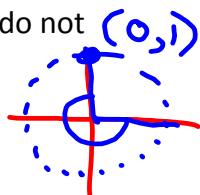

$$\csc(-135^\circ)$$

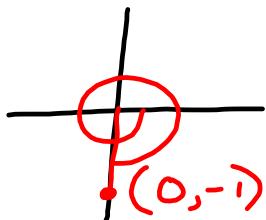

$$\boxed{-\sqrt{2}}$$

$$\tan(540^\circ)$$

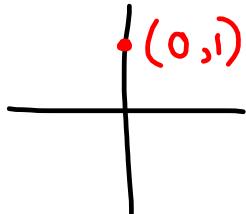

$$\frac{\sin 510^\circ}{\cos 510^\circ} = \frac{0}{-1} = \boxed{0}$$

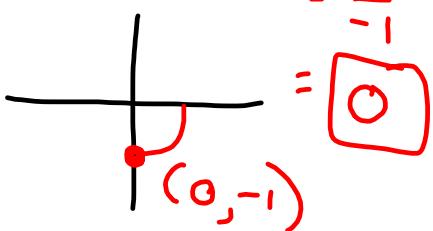

$$\sin(-450^\circ) = \boxed{-1}$$

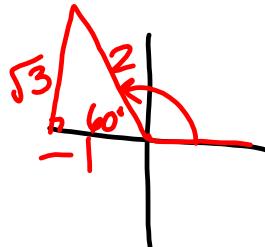

$$\csc(90^\circ) = \frac{1}{\sin 90^\circ} = \boxed{1}$$

$$\cot(-90^\circ) = \frac{\cos(-90^\circ)}{\sin(-90^\circ)} = \frac{0}{-1}$$

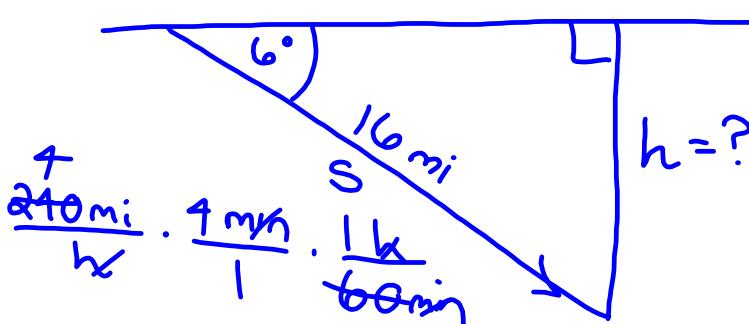

$$\cos(120^\circ) = \boxed{-\frac{1}{2}}$$

Homework questions?

## 5.2

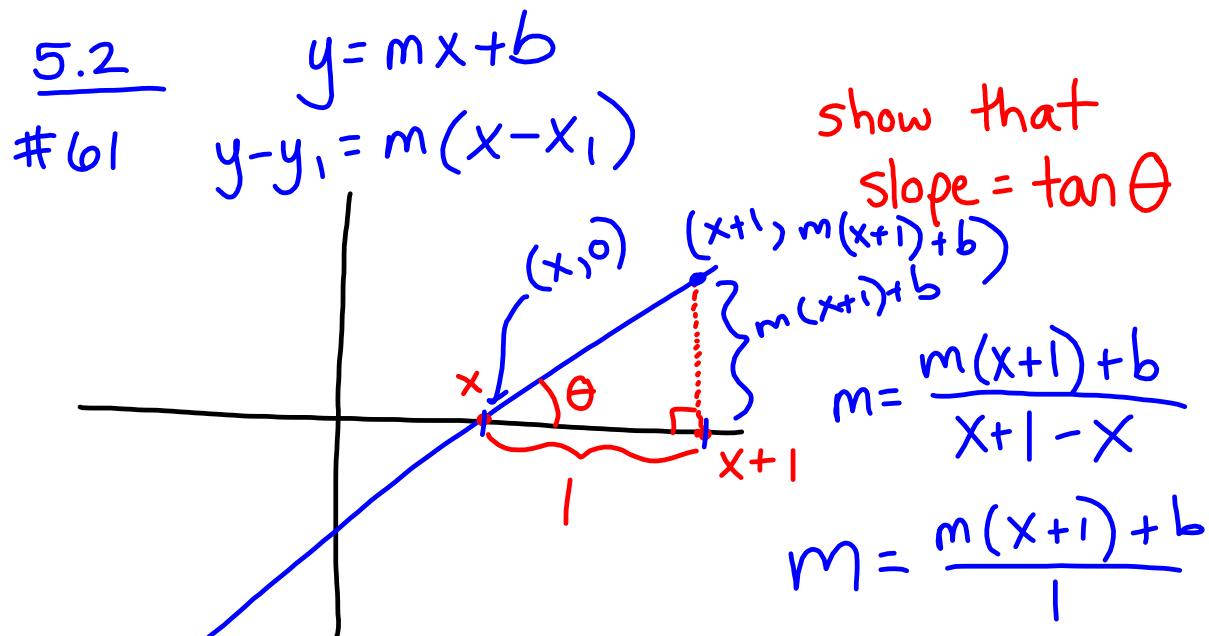

#67. 240 mph; descending @ angle of depression  $6^\circ$   
how many miles will plane descend in 4 min?

$$\sin 6^\circ = \frac{h}{16 \text{ mi}}$$

$$h = 16 \sin 6^\circ \text{ mi}$$

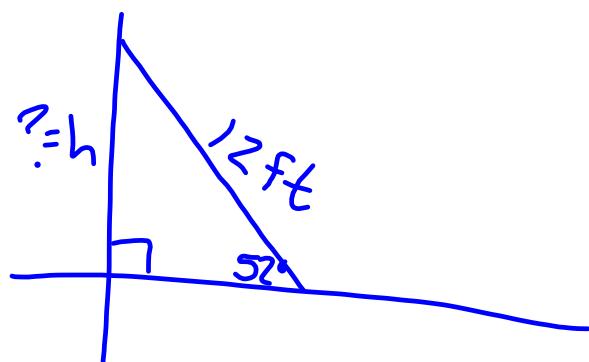

$$\approx 1.7 \text{ mi}$$

$$m = \frac{y - y_1}{x - x_1}$$

5.2

59.

Common angles:

(memorize!)

$$\frac{\pi}{6} = 30^\circ$$

$$\frac{\pi}{4} = 45^\circ$$

$$\frac{\pi}{3} = 60^\circ$$

Note:

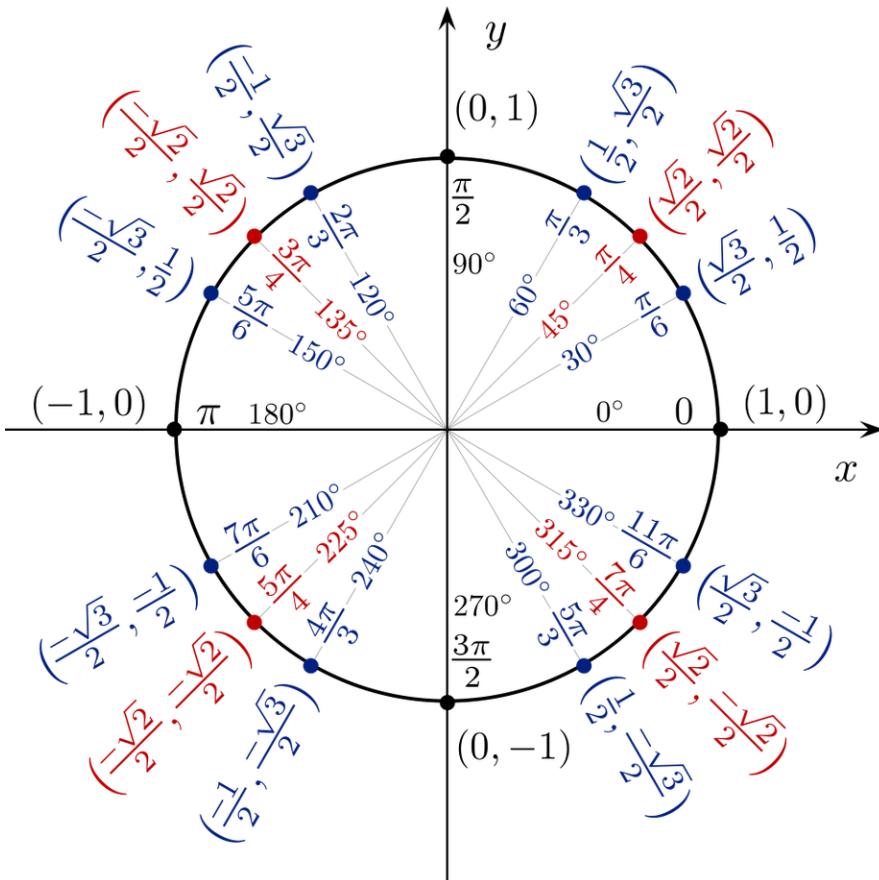

$$\frac{k\pi}{6} \rightarrow 30^\circ \text{ ref. } \angle$$

$$\frac{k\pi}{4} \rightarrow 45^\circ \text{ ref. } \angle$$

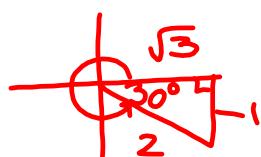

$$\frac{k\pi}{3} \rightarrow 60^\circ \text{ ref. } \angle$$

$$\frac{k\pi}{2} \rightarrow 90^\circ \text{ or } 270^\circ$$

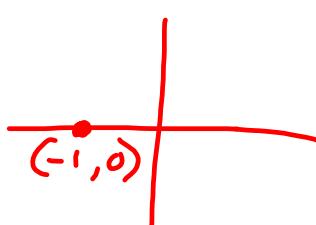

$k\pi \rightarrow 0^\circ$  for  $k$  even;  
 $180^\circ$  for  $k$  odd

Evaluate the trigonometric function of an angle given in radians

$$\cos \frac{11\pi}{6} = \boxed{\frac{\sqrt{3}}{2}}$$

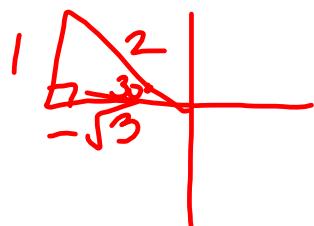

$$\sin 329\pi = \boxed{0}$$

$$\tan \frac{7\pi}{2} = \boxed{\text{undefined}}$$

$$\sec \frac{5\pi}{6} = \boxed{-\frac{2}{\sqrt{3}}}$$

**Homework:**

Due Wednesday, 11/13:

- "Do you know enough Algebra..." take home quiz

Due Friday:

- 5.2 #35-41odd; 59-75odd
- 5.3 #1-35odd; 37-48all; 61-68all

**We will go over the in-class quiz and Algebra quiz on Wednesday**
